

Inclusion in Action: UDL and AI Shaping Equitable Learning

DATES: August 25 & 26, 2025

NOTE: This practical 2-day virtual learning experience explores the intersectionality of Diversity, Equity, Universal Design for Learning (UDL), and Artificial Intelligence (AI) in today's education. Designed for educators in Nova Scotia, this offers a comprehensive look at how elements are shaping and positively impacting inclusive learning environments.

TIME: 9:00 am – 3:30 pm

TO REGISTER: Contact NSTU for registration details

COST: \$500.00 + HST

FOR MORE INFORMATION: Paula Evans, Professional Learning Coordinator, pevans@elcns.ca

FACILITATORS: Rebecca Frankin and Barbara Welsford

DESCRIPTION: This practical 2-day virtual learning experience explores the intersectionality of Diversity, Equity, Universal Design for Learning (UDL), and Artificial Intelligence (AI) in today's education. Designed for educators in Nova Scotia, this offers a comprehensive look at how these elements are shaping and positively impacting inclusive learning environments. Participants will delve into the importance of diversity in educational settings, explore the foundations and practical applications of UDL, and investigate the potential of AI in education on teacher well-being, developing efficient ways to design and deliver accessible content, and ultimately increase learner achievement for students. Through things like interactive sessions, group discussions, case studies, videos, testimonials, hands-on activities, etc., educators will integrate these concepts into their professional practice. Planned topics include UDL principles and implementation strategies, AI-powered educational tools, and methods for aligning AI with UDL to support ALL learners. By the end of the 2 days, it is expected that participants will be equipped to create more inclusive, equitable, diverse, and accessible learning experiences for all students.
